

EMERGENCY CALL SYSTEM WITH SOUND AND LIGHT WARNING

KIT PH6081

Complete sound and light warning system for accessible toilets and changing rooms.

COMPONENTS AND MAIN CHARACTERISTICS:

PCH6410 – Module with red-coloured light and sound warning. It is activated when an emergency call is made. It includes trim frame.

PCH6040 – Call module with cord. It is used to make alarm calls.

PCH6050 – Cancellation and call module. It can be used both to cancel the calls generated by module PCH6040, and to make calls and cancel them.

P3208 - 16 V DC power supply. Maximum current: 500 mA.

Apart from the above modules, the Kit also includes the blank cover for power supply P3208 and the trim frames.

All modules are installed in universal box.

MOST COMMON APPLICATIONS:

- Disabled Persons Toilet and Changing Room

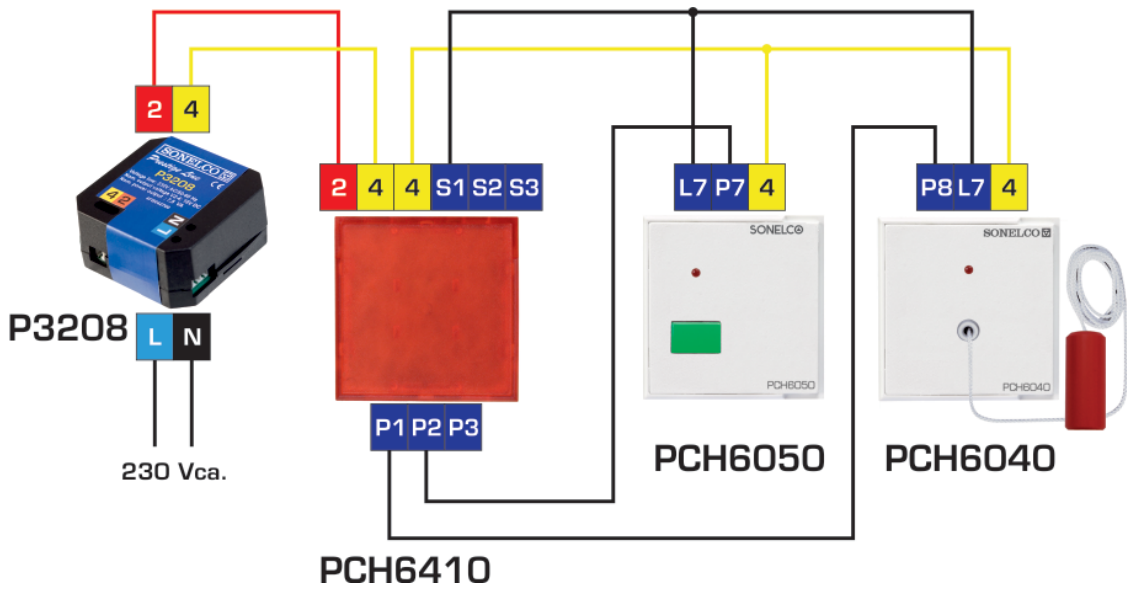

CALL CENTRALISATION

PCH6006 – Main signalling module (optional). This makes it possible to view and listen to calls from up to 6 points (bathrooms, changing rooms,...), equipped with modules PCH6410 or kit PH6081.
